Discover a surprisingly different Flanders

You can discover a surprisingly different Flanders from a boat. The surprising North Sea with its strong currents makes way for calmer waters. The ever-changing landscape glides passed the rivers and canals. Just look in your photo-album: the most beautiful places are always by the water. You can find numerous nature reserves, recreational domains, historic towns and pleasant villages alongside the Flemish waterways, and of course there are also the mapped out walk and cycle routes that connect to the towpaths along the waterways.

Sailing alongside Flemish waterways makes an unforgettable voyage of discovery.

Promotie Binnenvaart Vlaanderen stimulates the use of the Flemish waterways, both for professional and recreational uses, and, as such, is the point of contact for anyone involved in inland navigation and water recreation. Visit the website: www.binnenvaart.be and discover a wealth of useful information
